Delaware Division of Public Health Announces 458 Additional Positive Cases of COVID-19

SMYRNA (April 26, 2020) — The Delaware Division of Public Health (DPH) is announcing 8 additional fatalities related to coronavirus disease 2019 (COVID-19) and is providing an update on the number of positive cases and recovered individuals. All data reported through the daily updates are based on data received as of 6 p.m. the previous day.

In total,120 Delawareans have passed away due to complications from COVID-19. Individuals who have died from COVID-19 ranged in age from 32 to 103 years old. Of those who have died, 62 were females and 58 were males. A total of 55 individuals were from New Castle County, 22 were from Kent County, and 43 were from Sussex County. Seventy-four of the deaths involved residents from long-term care facilities.

DPH will provide demographic information for COVID-19-related deaths in aggregate only, and will no longer provide demographics of each individual person who died.

The most recent deaths announced today ranged in age from 52 to 87. Three were females and five were males. Three were New Castle County residents, four were Kent County residents, and one was a Sussex County resident. All of the most recent deaths involved individuals with underlying health conditions. Four individuals were residents of long-term care facilities.

To protect personal health information, DPH will not confirm specific information about any individual case, even if other persons or entities disclose it independently.

The latest Delaware COVID-19 case statistics cumulatively since March 11, provided as of 6 p.m., Saturday, April 25, include:

- 4,034 total laboratory-confirmed cases
- New Castle County cases: 1,599
- Kent County cases: 625
- Sussex County cases: 1,801
- Unknown County: 9
- Males: 1,822; Females: 2,178; Unknown: 34
- Age range: 0 to 103
- Currently hospitalized: 317; Critically ill: 61 (This data represents individuals currently hospitalized in a Delaware hospital regardless of residence, and is not cumulative.)
- Delawareans recovered: 911
- 15,215 negative cases*

*Data are provisional and subject to change. Data on negative cases are preliminary, based on negative results reported to DPH by state and commercial laboratories performing analysis.

Additional demographic data on COVID-19 cases and deaths, including race/ethnicity, more age-specific data and rates information by ZIP code, can be found on the <u>Division of Public Health's My Healthy Community data portal</u>. The data on My Healthy Community will supplement, not replace, the daily case data displayed on de.gov/coronavirus.

As a reminder, Governor John Carney's thirteenth modification to his State of Emergency declaration, requiring Delawareans to wear face coverings in public settings, including in grocery stores, convenience stores, pharmacies, doctor's offices, and on public transportation, goes into effect at 8:00 a.m. on Tuesday, April 28, 2020. Governor Carney's order does not require children aged 12 or younger to wear a face covering. Any child 2-years-old or younger MUST NOT wear a face covering, due to the risk of suffocation.

Delaware is considering patients fully recovered seven days after the resolution of their symptoms. Three days after symptoms resolve, patients are no longer required to self-isolate at home; however, they must continue to practice strict social distancing for the remaining four days before returning to their normal daily routine.

If you are sick with any of the following symptoms, stay home: fever, cough, shortness of breath, sore throat, muscle fatigue, or digestive symptoms such as vomiting, diarrhea, abdominal pain or lack of appetite. If you are sick and need essential supplies, ask someone else to go to the grocery store or the pharmacy to get what you need.

If you think you have been exposed to someone with COVID-19, or have symptoms of illness, make sure to distance yourself from others, particularly vulnerable populations. Older adults and people of any age with serious underlying medical conditions — including serious heart conditions, chronic lung conditions, including moderate to severe asthma, severe obesity and those who are immunocompromised, including through cancer treatment — might be at higher risk for severe illness from COVID-19.

Statewide testing at standing health facility testing sites require a physician's order or prescription to be tested (*Bayhealth patients will be pre-screened via phone without needing to see a provider first). These are not walk-in testing sites. Those without a primary care provider can call the DPH Call Center Line at 1-866-408-1899. In New Castle County, individuals can call ChristianaCare at 1-302-733-1000 and Sussex County residents who do not have a provider can call the Beebe COVID-19 Screening Line at 302-645-3200. Individuals awaiting test results should wait to hear back from their medical provider. The DPH Call Center does not have test results.

Anyone with a question about COVID-19, whether related to

medical or social service needs, should call Delaware 2-1-1; or 7-1-1 for individuals who are deaf or hard of hearing, or text your ZIP code to 898-211. Hours of operation are 8 a.m. to 9 p.m. Monday through Friday; 9 a.m. to 5 p.m. Saturday and Sunday.

In addition, the Division of Public Health asks any Delaware health care, long-term care, residential, or other high-risk facility with questions or concerns to email: DPH_PAC@delaware.gov or call the DPH Call Center at 1-866-408-1899 and press ext. 2.

Questions can also be submitted by email at DPHCall@delaware.gov.

DPH will continue to update the public as more information becomes available. For the latest on Delaware's response, go to de.gov/coronavirus.
